TRUTHFULNESS SCALE: LOW RISK RANGE RISK PERCENTILE:38
 This is an accurate SAQ profile and other scale scores are accurate. This individual responded to the test items in a non-defensive, cooperative and truthful manner. Denial and distortion are minimal. This person has adequate reading skills and was truthful. The Truthfulness Scale is designed to identify self-protective, recalcitrant and guarded people who minimize or even conceal self-report information.

ALCOHOL SCALE: PROBLEM RISK RANGE RISK PERCENTILE:88
 Alcohol abuse is evident. Alcohol (beer, wine or liquor) use and abuse are likely focal issues. An established pattern of alcohol abuse is indicated, or this person is a recovering (alcohol problem, but has stopped drinking) alcoholic. RECOMMENDATIONS: Counseling and/or Alcoholics Anonymous (AA) attendance might be helpful. Relapse is possible. Attendance and compliance should be monitored. With regard to the Alcohol Scale, this is a problem risk score.

DRUGS SCALE: MEDIUM RISK RANGE RISK PERCENTILE:57
 An established pattern of drug use or abuse is not evident, however, there may be a "proneness" toward drug use or abuse. Drug use may be experimental or historical. RECOMMENDATIONS: Important areas of inquiry include the client's history and pattern of drug use. Participation in Narcotics Anonymous (NA), Cocaine Anonymous (CA) or a drug-oriented educational program could be helpful. With regard to the Drugs Scale, this is a medium risk score.

RISK SCALE: MEDIUM RISK RANGE

RISK PERCENTILE:69

Under normal conditions this client does not represent as a risk to self or others. However, this individual's risk potential would increase under stress, during substance abuse or in response to provocation. This Risk Scale score represents medium risk. This client will benefit from clearly understood expectations and consequences.

SIGNIFICANT ITEMS: The answers are the client's self-reported responses. And, they represent direct admissions or unusual responses, which may help in understanding the client's situation.

ALCOHOL

DRUGS

- 10. Concerned about drinking
- 34. Admits a drinking problem
- 49. Acknowledges drinking problem
- ** Alcohol-related convictions: 2

- 43. Past year, drug problem
- ** Drug-related convictions: 1

RISK

- | | |
|-----------------------------------|---------------------------------|
| ** Age at first conviction.... 19 | ** Times on parole..... 1 |
| ** Misdemeanor convictions.... 4 | ** Parole revocations..... 0 |
| ** Felony convictions..... 1 | ** Sentenced to jail..... 2 |
| ** Times on probation..... 1 | ** Sentenced to prison..... 1 |
| ** Probation revocations..... 0 | ** Years in jail and prison.. 3 |

SECTION 2: The client's answers to multiple choice items are printed below. These answers represent the client's opinion--with all of its biases. These multiple choice answers allow comparison of the client's subjective opinions with objective and empirically base scale scores.

- 61. Client describes their drinking problem as: moderate problem
- 62. Client describes their drug problem as: moderate problem
- 63. Alcohol treatment: some motivation (undecided)
- 64. Drug treatment: little motivation for help
