TRUTHFULNESS SCALE: LOW RISK RANGE RISK PERCENTILE: 33
 This is an accurate Shoplifting Inventory (SI) profile and other SI scale scores should be accurate. The Truthfulness Scale identifies faking, guardedness, defensiveness and minimizing. This person has adequate reading skills and was truthful. This is a Low Risk (zero to 39th percentile) score.

* * SUMMARY PARAGRAPHS EXPLAINING CLIENT'S ATTAINED SCALE SCORES * *

ALCOHOL SCALE: PROBLEM RISK RANGE RISK PERCENTILE: 85
Alcohol use and abuse is indicated. Alcohol abuse may be a focal issue in this person's adjustment problems. Either this person is a recovering alcoholic, or an established pattern of alcohol abuse is indicated. This is a Problem Risk (70 to 89th percentile) score.

DRUGS SCALE: PROBLEM RISK RANGE RISK PERCENTILE: 75
Drug use or abuse is indicated and may be a focal issue in this person's adjustment problems. Either this person is a recovering (drug problem, but has stopped using) drug user, or manifests an established pattern of drug use. This is a Problem Risk (70 to 89th percentile) score.

ANTISOCIAL SCALE: PROBLEM RISK RANGE RISK PERCENTILE: 85
An established pattern of antisocial behavior is indicated. Problem Risk scorers often show a chronic problem in conforming to society, a moral or ethical blunting, and little sympathy or empathy. These individuals are frequently callous, boastful, irresponsible and even deceitful with poor work histories.

SHOPLIFTING SCALE: PROBLEM RISK RANGE RISK PERCENTILE: 88
Shoplifting appears to be an established pattern that has likely evolved. Shoplifting as a "stage of development" does not excuse chronic stealing. This scale score is not associated with a one-time victimization. This person's score is in the Problem Risk (70 to 89th percentile) range.

ENTITLEMENT SCALE: MEDIUM RISK RANGE RISK PERCENTILE: 67
This person's response pattern indicates a growing departure from acceptable entitlement thinking, which may impact on motivation, value and adjustment. A tendency toward dependence or lack of self-actualization is evident. This individual's score is in the Medium Risk (40 to 69th percentile) range, within the high end of the average range.

PEER PRESSURE SCALE: MEDIUM RISK RANGE RISK PERCENTILE: 69
This person's score is in the Medium Risk (40 to 69th percentile) range. Peer group opinion and acceptance are important, but not necessarily extreme. Peer groups vary from loosely knit alliances to organized groups or even gangs. This is a High Medium score, peer pressure may be important.

SELF-ESTEEM SCALE: MEDIUM RISK RANGE RISK PERCENTILE: 51
This person's self-esteem is intact and he or she is not overly apprehensive about the future. Such persons are usually poised, self-confident, have a positive self-concept and feel adequate. Self-esteem is descriptive of the person one believes oneself to be. This person

has adequate to good self-esteem.

IMPULSIVE SCALE: MEDIUM RISK RANGE

RISK PERCENTILE: 68

Even though a Medium Risk (40 to 69th percentile) score was attained, some indicators of impulsive, planning or decision making problems are evident. This may represent a tendency for impulsiveness, poor decision making or planning difficulties. This is a Medium Risk score.

SIGNIFICANT ITEMS: The following self-report responses represent areas that may help in understanding the client's situation.
