		----- PERCENTILE SCORES -----		

* * SUMMARY PARAGRAPHS EXPLAINING CLIENT'S ATTAINED SCALE SCORES * *

TRUTHFULNESS SCALE: LOW RISK RANGE RISK PERCENTILE:39
 This is an accurate TII-Juvenile profile and other scale scores are accurate. This individual responded to test items in a non-defensive, cooperative and truthful manner. Denial and distortion are minimal. This client has adequate reading skills and was truthful. The Truthfulness Scale is designed to identify self-protective, recalcitrant and guarded people who minimize or even conceal self-report information.

ANXIETY SCALE: MEDIUM RISK RANGE RISK PERCENTILE:68
 Some indicators of tension or pressure are evident. The interaction of anxiety and depression is common, and could represent an area for additional inquiry. Review other TII-Juvenile scales and then conduct

a focused interview. This is a medium risk Anxiety Scale score.

DEPRESSION SCALE: MEDIUM RISK RANGE RISK PERCENTILE:67
Some feelings of depression are indicated. Anxiety may also contribute to this client's overall adjustment problem. These two symptoms of distress--anxiety and depression--represent an area for additional inquiry in interview. This is a medium risk score.

ALCOHOL SCALE: PROBLEM RISK RANGE RISK PERCENTILE:73
Alcohol (beer, wine or liquor) problems are indicated. Either this youth has a drinking problem or is a recovering (alcohol problem, but has stopped drinking) alcoholic. A pattern of alcohol abuse is evident. Relapse is possible. Alcohol-related counseling (treatment) and/or Alcoholics Anonymous (AA) participation are recommended. This is a problem risk Alcohol Scale score.

DRUGS SCALE: MEDIUM RISK RANGE RISK PERCENTILE:55
Some indicators of drug use are present, however, an established pattern of drug abuse is not evident. Drug-related problems are likely not focal issues. Participation in an educational (alcohol and other drug abuse) program could be considered. Interview to establish this youth's history and pattern of drug involvement. This is a medium risk Drugs Scale score.

STRESS COPING SCALE: MEDIUM RISK RANGE RISK PERCENTILE:63
Stress coping abilities are not well established. Although usually capable of coping with stress, this client manifests some stress coping problems and concerns. Stress may be situation specific. Interview regarding life situation and lifestyle to clarify problem areas.

SELF-ESTEEM SCALE: LOW RISK RANGE RISK PERCENTILE:36
High self-esteem is indicated. Positive self-esteem reflects positive feelings, attitudes, and self-perceptions. However, extremely low scores may reflect an inflated or narcissistic self-concept. Self-esteem refers to a person's view of himself or herself. It reflects an explicit valuing and appraisal of oneself. Low risk scorers accept and approve of themselves.

DISTRESS SCALE: PROBLEM RISK RANGE RISK PERCENTILE:72
This juvenile's Distress Scale score is in the Problem Risk (70 to 89th percentile) range. Problem risk scores typically reflect considerable worry, apprehension and unhappiness. This is a troubled youth. Feeling of dependency and suicidal ideation should be explored in interview. Other areas of inquiry might include this youth's life situation, adjustment and emotional equilibrium. This adolescent is experiencing considerable distress and is not coping with it well.

FAMILY ISSUES SCALE: MEDIUM RISK RANGE RISK PERCENTILE:60
This youth's Family Issues Scale score is in the Medium Risk (40 to 69th percentile) range. Medium risk scorers typically perceive family conflict and growing concerns, yet still value family harmony, accord and homeostasis. Some concern about family problems, conflicts and concerns is indicated. However, this youth's responses indicate a desire for family harmony. This is medium risk score.

SIGNIFICANT ITEMS: The following self-report responses represent areas that may help in understanding the inmate's situation.

ALCOHOL

- 21. States a recovering alcoholic
- 35. Two or more memory losses
- 133. Drinking a moderate problem

DRUGS

- 134. Drugs a moderate problem
- 137. States recovering drug abuser

DISTRESS

- 50. Wants to talk to a counselor
- 123. Wants child abuse counseling
- 135. Rated distress moderate prob
- 136. Mental health moderate problem
- 141. Within 30 days: homicidal

FAMILY ISSUES

- 3. Feels like nobody cares
- 123. Wants child abuse counseling
- 142. Moderate family problems

ANXIETY

- 7. Often tense, nervous, anxious

DEPRESSION

- 3. States "nobody really cares"
- 22. Needs somebody to talk to
